Technical Date Sheet of Phenolic Resin 2402

Chemical name: p-t-butyl phenol-formaldehyde resin 2402
CAS NO.: 25085-50- 1

Technical Data of Phenolic Resin 2402:

Items	Specifications
Appearance	Yellow flake solid.
Softening point, °C	90-120
Hydroxymethyl group, %	10-16
Free phenol content, %	≤1.5
Free aldehyde content, %	≤0.5
Specific gravity	1.086
Volatile, %	≤1.0

Application:

Mainly used as a tackifier for polychloroprene (CR) rubber contact adhesives; as a vulcanizing agent for butyl rubber; and in the manufacture of fire-retardant coatings, anticorrosive paints, printing inks, and rubber belts.

Package:

In 25kg bags.

Storage:

Stored in a dry ventilated area.
